

MICROSOFT[®] DYNAMICS - NAV - INVENTORY MANAGEMENT

Introduction

This 1 to 2 day course explores the Microsoft Business Solutions–Navision Inventory Management application from a user's perspective. Modules in this hands-on classroom experience include functionality available in the standard edition of Microsoft Navision. Application functionality covered in the course includes reservations, multiple location setup, location transfers, warehousing, and item tracking. All material used in the Microsoft Navision Inventory Management course is based on version 4.00 of Navision.

Audience

This training manual is intended for Microsoft Certified Business Solutions Partners' employees selling, implementing and supporting Microsoft Navision. This audience typically includes application consultants who are tasked with assessing a customer's business needs and advising them on the use, configuration and customization of the application. Additionally, consultants who are responsible for training or supporting the customer will benefit from the course.

At Course Completion

- After completing this course, students will be able to:
- Monitor inventory levels and projected item availability.
- Reserve items and use order tracking functionality to track orders.
- Set up and use multiple locations within a company.
- Set up and use transfers to move quantities between locations.
- Perform basic warehousing operations including receiving, putting away, picking, and shipping.
- Set up and use item tracking features such as serial number tracking, lot number tracking, warranties, and expiration dates.

Prerequisites

Before attending this course, students must have:

- Successfully passed the Attain Overview test, or have equivalent experience with Navision Attain (Financials) application
- Successfully passed the Attain Essentials test. A background in distribution or logistics.
